Europe's brewers today face a sobering reality. Despite remarkable resilience through a pandemic, inflationary shocks and geopolitical instability, the continent's beer market is in difficulty.

The numbers in this year's European Beer Trends report make this reality unmistakable: the beer market has not returned to pre-pandemic levels, on-trade beer hospitality is in long-term decline and the first numbers coming out for 2025 show an even worse situation than in 2024. Compared to five years ago, production, consumption and exports have fallen nearly everywhere, with bright spots few and far between.

For a sector that has long been a symbol of Europe's cultural

vibrancy, creativity and social life, this pattern marks a crisis that policymakers and stakeholders can no longer afford to overlook.

Yet understanding the cause of this downturn requires nuance. There is a deep and pervasive collapse in consumer confidence that has taken hold across the continent. Whilst prices are going up, due to the increased costs throughout the beer value chain, people are also spending less because they are uncertain about the future. This is materially reshaping consumption patterns, especially for sectors like beer that rely heavily on celebration, hospitality venues, cultural activities and shared social experiences.

The data underscores these dynamics. European Union beer production continued its gentle slide, declining from roughly 367 million hectolitres in 2019 to 345 million in 2024. Consumption actually seems to have marginally stabilised in 2024 compared to the previous year, but it is continuing to fall in 2025 and is still well below the pre-pandemic level of 320 million hectolitres in 2019. Exports – once a cornerstone of growth and the big compensator for falling consumption within the EU – cooled for the second consecutive year.

And the hospitality sector, with its pubs, beer halls, seaside cafés and taverns the beating heart of European beer culture, continues to struggle. Where pre-pandemic, the on-trade represented about one-third of beer consumption, today it hovers around one-quarter across the EU. This matters. The on-trade, despite being smaller in volume, provides most of beer's added value, includes hundreds of thousands of SMEs, and is essential to the cultural and social fabric of European life. A flattening or contracting hospitality sector has ripple effects throughout the beer value chain – from farmers supplying barley and hops to packaging producers, logistics, wholesalers and the countless small businesses anchored in beer tourism and community life.

Ominously, one of the few positive markers of dynamism in Europe's brewing landscape in recent years, and a critical driver of consumer choice – the growing number of breweries, even during the hardest of times – has stalled for the second year running. The report records just over 9,700 active breweries across the EU, with the number of openings now mirrored by slightly more closures.

One continuing bright spot is the continued expansion of non-alcohol beers, which remain the sector's strongest growth category and have grown by a quarter in the last five years. They now represent a significant and rising share of total sales, with 7.5% of beers now in that category, increasingly served on tap and catering to all tastes and consumers. This is not merely a commercial trend – it shows brewers leading on moderation, responding to evolving lifestyles, and offering consumers more choice at more moments of the day. It is an innovation success story underpinned by years of investment and technological progress.

Still, the challenges facing Europe's brewers are real, structural and urgent. Costs remain elevated across raw materials, energy and transport. Climate-related pressures on agriculture continue to affect yields and supply stability. And all of this is compounded by the fragile state of consumer confidence. In such an environment, brewers are unequivocal: this is the time for support, not disproportionate, unjustified or counterproductive regulations.

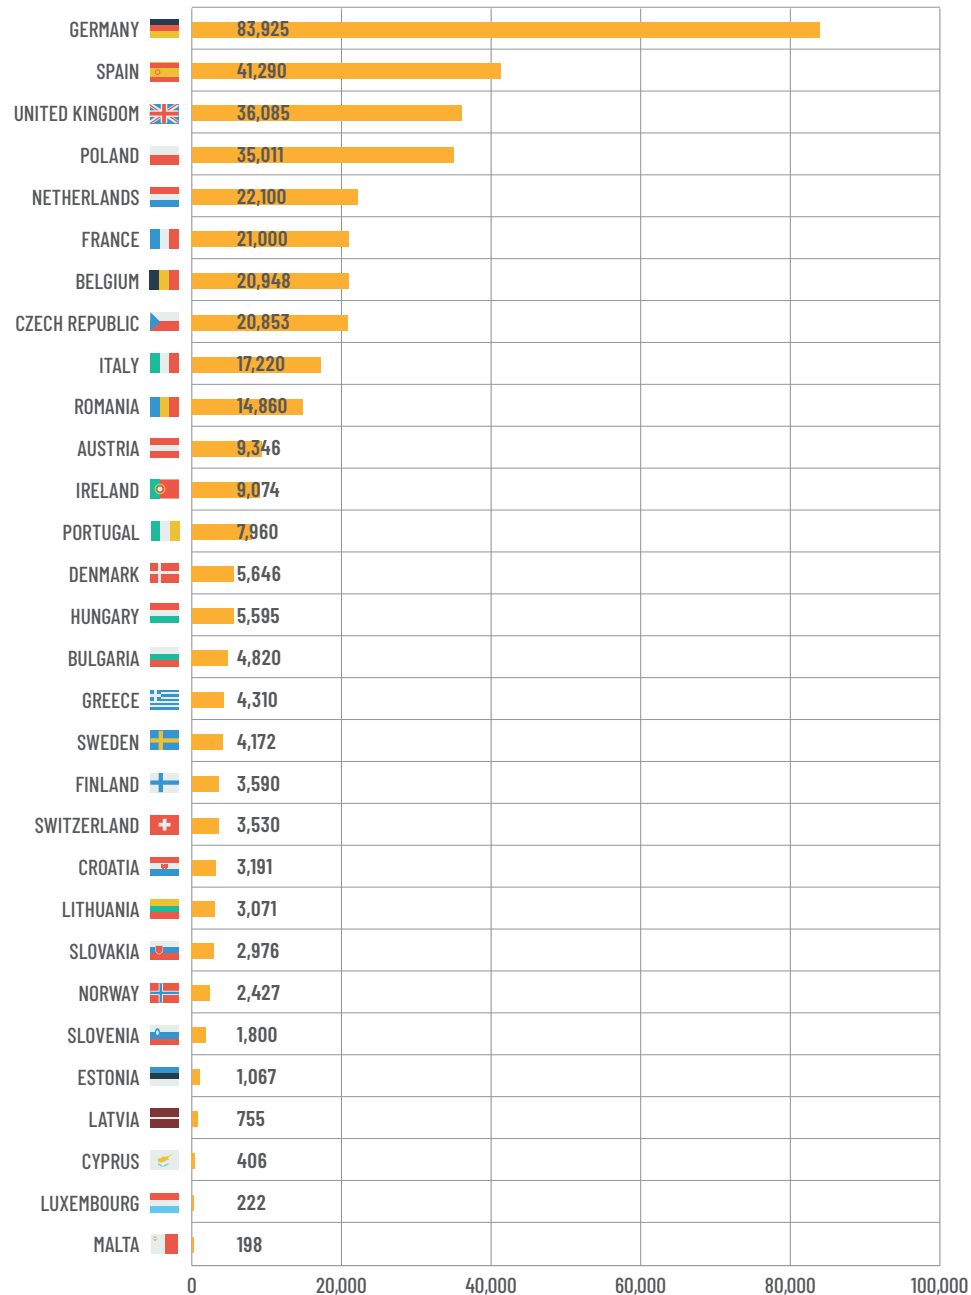

More legislation cannot always be the answer when, too often, well-intentioned rules ultimately undermine economic recovery, whilst simultaneously failing to meet, or even jeopardising, their objectives, be they in the area of tax revenue generation, environmental sustainability or public health.

Europe's brewers are already committed to a greener and more circular economy. Many are pioneers in reducing water use, scaling renewable energy, adopting closed-loop packaging and improving efficiency across the value chain. Legislative frameworks that overlook real-world operations threaten to weaken, rather than accelerate, sustainability progress.

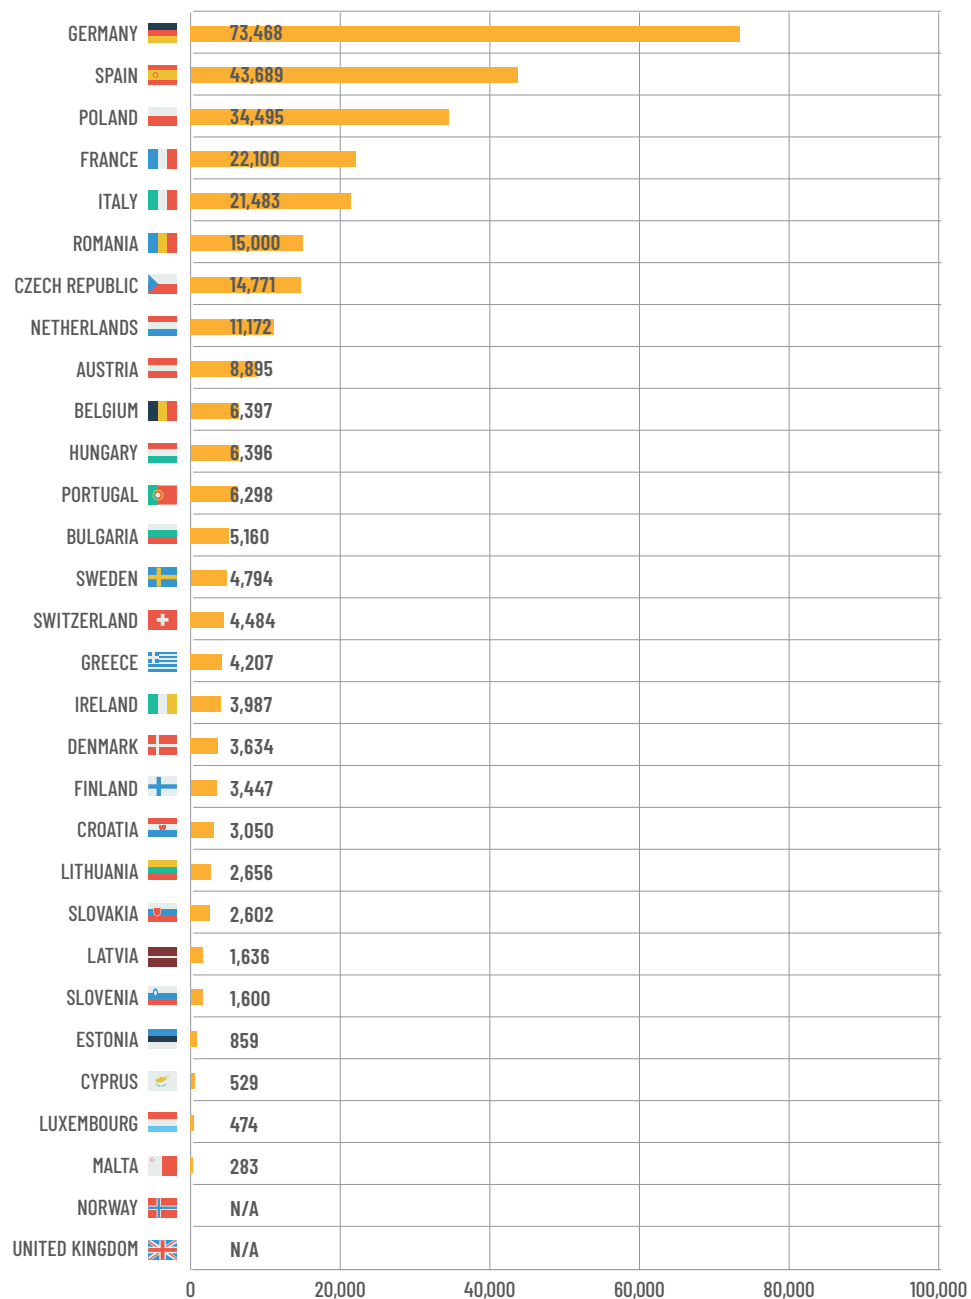

Equally, we are talking about a beverage category that actively helps adult consumers to moderate their alcohol consumption. Fermented, rooted in nature, diverse and low alcohol (or even non-alcohol in one in thirteen cases), the sector itself is geared towards supporting mindful consumption choices. Legislation can actually be used to support beer and moderation rather than pile on further misery.

This is why the figures in this report should serve not only as a statistical snapshot but as an urgent call to action. Europe's brewing sector needs regulatory stability and support – a recognition that beer is more than just another alcohol product. It is a vital part of Europe's cultural heritage, a major local job generator, a conduit for responsible consumption, a sustainability pioneer and, through beer hospitality and cultural events, a driver of social cohesion across cities, towns and rural communities. Reviving beer hospitality requires restoring consumer confidence, supporting SMEs and ensuring regulation strengthen – not weaken – Europe's competitive position.

Beer has always been a symbol of celebration, connection and conviviality. As brewers confront a difficult moment, their commitment to these values remains unwavering. With smart policy, renewed confidence and continued innovation, Europe's beer story can continue to evolve – honouring its centuries-old traditions while building a resilient, responsible and sustainable future for generations to come.

**BEER:**

Beer definitions differ from country to country. Please note that the inclusion or not of non-alcohol beer may vary amongst countries

**BEER PRODUCTION:**

Beer produced within a given country.

**BEER CONSUMPTION:**

Beer consumed within a given country.

**BEER CONSUMPTION PER CAPITA:**

Consumption per head in a given country.

**BREWERY:**

A plant or an establishment for beer production.

**BREWING COMPANY:**

A company which produces and / or sells beer, operating one or more breweries. These companies may also be involved in activities other than brewing beer, such as the production of soft drinks and bottled mineral water.

**DIRECT EMPLOYMENT:**

Employment directly by the brewing companies.

**EXCISE DUTY REVENUE RELATED TO BEER:**

Government revenues generated from excise duties on the sale of beer.

**EXPORT EXTRA-EU:**

Extra-EU exports of goods are goods which leave the territory of the European Union for a third country after being placed under the customs procedure for exports (for definitive export) or outward processing (goods for working, further processing) or repair or following inward processing.

**EXPORT INTRA-EU:**

Intra-EU exports of goods are goods which leave a Member State of the EU for another Member State for definitive export, outward processing or repair or following inward processing.

**HECTOLITRE (HL):**

A hectolitre is a metric unit of volume or capacity where one hectolitre equals 100 litres.

#### **IMPORT EXTRA-EU:**

Extra-EU imports of goods are goods which enter the territory of the European Union from a third country and are placed under the customs procedure for free circulation within the EU (as a general rule goods intended for consumption), inward processing or processing under customs control (goods for working, processing or repair) immediately or after bonded warehousing.

#### **IMPORT INTRA-EU:**

Intra-EU imports of goods are goods which enter a Member State of the EU from another Member State for definitive import (as a general rule goods intended for consumption), inward processing or processing under customs control (goods for working, processing or repair) immediately or after bonded warehousing.

#### **MICROBREWERY:**

A brewery with yearly production up to 1,000 hectolitres.

#### **OFF-TRADE SECTOR:**

Beer sales through wholesale and retail (shops, supermarkets and other outlets).

#### **ON-TRADE SECTOR:**

Beer sales through (licensed) pubs, clubs, bars, restaurants, etc., also called the hospitality sector.

## 15

### METHODOLOGY

The data for the 2025 edition were mainly collated via the national brewers' associations through surveys by The Brewers of Europe.

With the received data the corresponding tables and charts have been prepared and verified with the interlocutors from different countries. Therefore, unless indicated otherwise in this or previous editions, all data comes from national brewers associations.

When data was not available through national associations other sources were used to complete as much as possible the tables. The sources used for this edition include:

- National brewers' associations data
- Eurostat
- Euromonitor
- European Commission
- National authorities

Figures contained in some tables may have been rounded and also corrected from previous editions of this publication.

## 16

### ACKNOWLEDGEMENTS

The Brewers of Europe Secretariat would like to thank all those from national brewers associations who contributed to this brochure.

We thank Woomera Communications sprl for the document's design and support.

The information and data contained in this document are those provided by national associations unless stated otherwise. Where possible The Brewers of Europe Secretariat ensured the accuracy of the figures by checking with the national associations and against data coming from other sources.

The Brewers of Europe does not take any responsibility for omissions, mistakes or errors appearing in this brochure which do not come from its own activities.
